

# FLEXX Utility

*Creativity stands still no longer, introducing Flexx.*

Fixed static seating was considered obsolete in the workplace in the late eighties, it is now also a thing of the past in the educational space!

The human body is not meant to remain static; we are naturally built to move. Flexx is fitted with a dynamic tilting action, perfectly suited to academic environments and assists users' ability to remain focused. It encourages concentration and minimises the ever so common 'fidgety' behaviour. Flexx is lightweight, strong, durable, and fitted with breathable perforations for extra user comfort.

## Features and benefits

Dynamic tilting action

Absolute vertical stacking up to 12 high

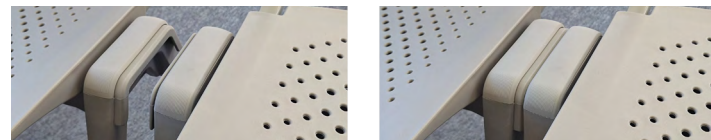

Built in chair linking system

Self-levelling feet

Breathable perforated PU seat & backrest

Only weighs 4.4kg!

Rated to 110kg

BUILT IN LINKING SYSTEM
